

## Inviting your students

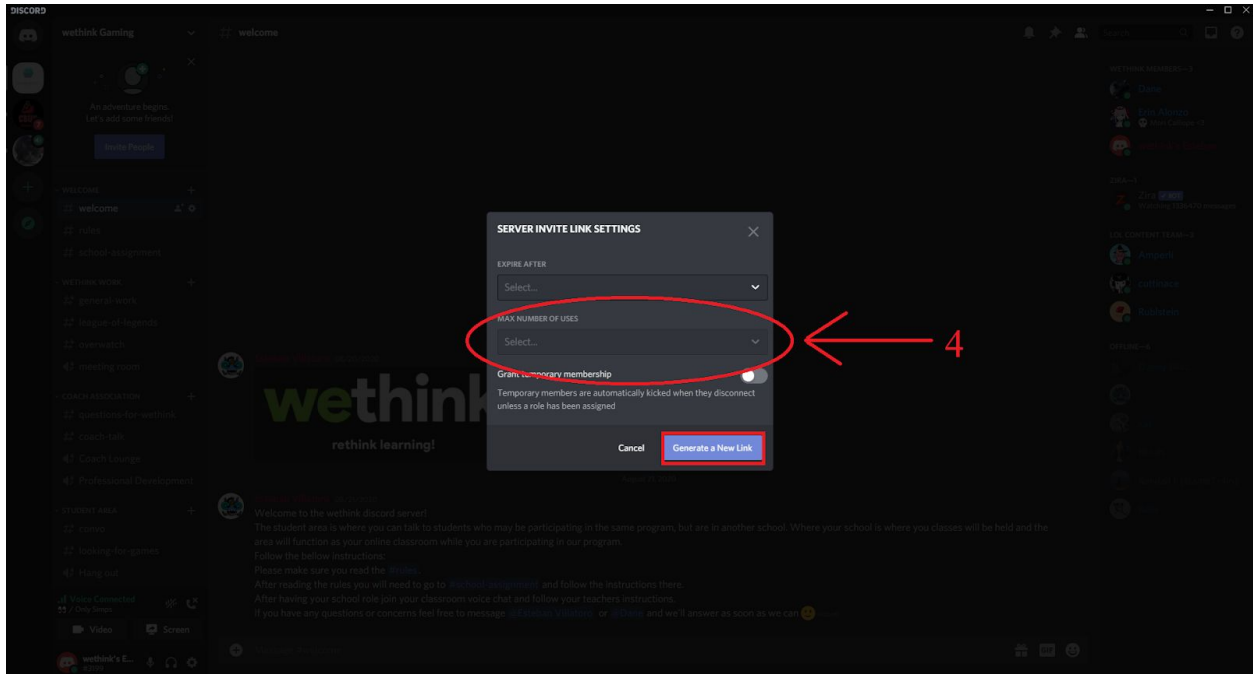

1. Select the welcome text channel.
2. Right click on the welcome text channel and select invite people.

3. Select edit invite link located below the link which is provided by default.

4. Change the “MAX NUMBER OF USES” to match how many students you have.  
“EXPIRE AFTER” does not matter, but for your convenience it may be easier to select never.
  - a. New links can always be created and old links can be taken offline on our end.
  - b. Limiting the number of uses per link makes our server safer and tighter under control.

5. Click “Generate a New Link” and you will be provided with a link that follows the setting you just implemented.
6. Share link with your students. This can be done a number of ways:
  - a. Post onto a page on your LMS that the selected students can access.
  - b. Send an email to all your students.
  - c. Send the link in direct message to students (This may be the case for students who join the program late).
